

## **Mike Tahin**

*Quality and Completions Manager  
LS Precast Benalla*

### **Project**

North East Link and West Gate Tunnel Project

### **What role did ProQM perform on the project?**

NATA accredited surveillance officer.

### **What did the project involve?**

Fabrication of critical precast elements for the construction of bridge segments, tunnel segments and other associated precast elements.

### **What inspection and surveillance services were needed?**

ProQM were engaged to provide inspection and surveillance services for hold point inspections, these included pre pour checks, repair verification and other surveillance required by the project.

### **How did ProQM assist with the project, and what was the benefit of having ProQM on board?**

ProQM provided the project with professional services including highly competent and friendly inspectors. The result of their involvement was a facility that maintained the utmost compliance, as well as a higher quality product for the end user. Furthermore, the industry knowledge of the inspectors engaged by ProQM provided the LS Precast team with advice that has resulted in improved processes.
